

Future Delivery at the ITS World Congress via !TSFuture

Future Delivery was selected as one of 60 startups to exhibit in the startup area at the *ITS World Congress* (itsworldcongress.com), the largest mobility congress in the world. The startup places were awarded by the initiative *!TS Startup* (itsfuture2021.com) - For this, all startups had to apply in advance with a pitch deck, and were accepted or rejected after evaluation by the operators.

The ITS World Congress is the most important international industry event in the field of intelligent transport systems and services. Experts from the mobility, logistics and IT industries as well as representatives from politics and associations will meet in Hamburg from 11 to 15 October 2021. The congress will be held under the motto "Experience Future Mobility Now".

The Future Delivery team is looking forward to exhibiting its proprietary technology at such a high-profile conference and sees participation as an opportunity to validate the technology and find potential partners and customers.

About us

Future Delivery is a project to develop a technology to exchange packages in the air between two drones. In the first step, Future Delivery is developing a way to physically and securely connect drones in the air. Exchanging packages in this way makes it possible to combine the advantages of individual drone types. The development team has been working on the idea since 2020, which was submitted to the German Patent and Trademark Office in September of 2021.
